Methodology

The UNF Poll of Congressional District 5 was conducted and sponsored by PORL at the University of North Florida, from Friday, Aug. 17, through Sunday, Aug. 19, by live callers via the telephone; calls were made from 4 to 9 p.m. daily. Interviews were conducted in English only by UNF students. The phone numbers used for this survey came from the voter file database provided by the Florida Division of Elections' June 13, 2018, update.

The sample frame was comprised of likely voters who reside in Congressional District 5. Likely voters were determined by vote history, having voted in either the 2014 or 2016 primary elections, all voters who were 18 and 19 years of age were included as likely since they were ineligible to vote in the previous primary. Likely voters, who met these requirements were then randomly contacted by probability sampling. Respondents who answered that they would "definitely vote," "probably vote" or had "already voted" in the upcoming Florida Primary Election qualified to participate in the survey. Overall, there were 402 completed surveys of likely Congressional District 5 Democratic voters, 18 years of age or older.

The margin of sampling error for the total sample is +/- 4.9 percentage points. The breakdown of completed responses on a landline phone to a cell phone was 38 to 60 percent (2 percent were unidentified). A single interviewer, through hand dialing, upon reaching the specific registered voter as identified in the Florida voter file, asked the respondent to participate, regardless of landline telephone or cell phone. To ensure a representative sample being collected, the district was stratified based on whether the respondent lived in Duval County or outside the area. The total sample was then weighted by age, sex and race (ASR weights) from the total population of likely voters determined by the above criteria. Education weights were determined by computing a high education turnout from the ASR weighted education question and a low education turnout from the 2016 American Community Survey One-Year education data source and establishing a median weight between these two turnout education weights. There were no statistical adjustments made due to design effects.

The PORL is a full-service survey research facility that provides tailored research to fulfill each client's individual needs from political, economic, social and cultural projects. The PORL opened in 2001 and is an independent, non-partisan center, a charter member of the American Association for Public Opinion Research Transparency Initiative and a member of the Association of Academic Survey Research Organization. For more information about methodology, contact Binder at porl@unf.edu or at (904) 620-2784.

Completed Surveys by Geographic Region within Congressional District 5

Total Sample	n=402
1 – Duval county	195
2 – All other counties	207

Survey Results

As you may know the Florida Primary Election is being held on August 28th. How likely are you to vote in this election…

Answer Options	CD5 Likely Voters n=402
You will definitely vote	82%
You will probably vote	8%
Already voted	10%

In your opinion, what is the most important problem facing the US today? [ROTATE ANSWERS]

Answer Options	CD 5 Likely Dem Voters n=402	Duval County CD 5 Likely Dem Voter n=195	Non Duval County CD 5 Likely Dem Voter n=207
Economy/Jobs/Unemployment	7%	7%	7%
Education	9%	9%	10%
